Experience

Lead UX Designer, Salesforce — Mar 2024 - Present

Set design strategy across Customer Signals Intelligence (CSI) and Survey Feedback Management (SFM), designing AI-driven intelligence that surfaces actionable insights across channels. Lead future-of-Service-Cloud vision work, defining how AI reshapes the service experience — not just the next release.

Staff Product Designer, VMware — May 2022 - Dec 2023

Spearheaded strategic initiatives within Aria Operations for Networks. Alongside delivering designs for key sections, took on the added responsibility of guiding the design direction for fellow designers.

Lead Product Designer, BMC Helix — Jan. 2016 - Apr. 2022

Led UX for Business Workflows — enterprise workflow automation. Designed Innovation Suite, an extensible low-code platform for building ITSM products. Owned design across Innovation Labs (IoT, DataOps), taking multiple 0-to-1 products from research to launch.

UX-Lead, Clarice/ Globant — Apr. 2013 - Dec. 2015

Designed critical enterprise products and led the team's design output. Aligned designers, engineering, customers, and executives around buildable, shippable UX.

UX-Lead, Hcentive/ Optum — Apr. 2012 - Feb. 2013

Led a cross-functional team (interaction, visual, front-end) designing a Health Insurance Exchange (HIX) portal for public and private markets.

Earlier, Design Consultant, Texity / Qualcomm (2008–2011) and Product Designer, Mangospring (2006–2008) — Research-driven design of enterprise and startup products, concept through ship.

Selected Projects

Customer Signals Intelligence at Salesforce

CSI transforms customer data into actionable insights that improve experiences, increase retention, and accelerate profitable growth. By unifying signals across channels and applying analytics, brands can understand needs and make better decisions across sales, service, and commerce teams..

Aria Operations for Networks at VMWare

It monitors, discover and analyse networks and applications to build an optimised, highly available and secure network infrastructure across clouds.

Business Workflows at BMC

It's a service management solution that enables service delivery owners in all lines of business (LOBs) to manage, automate, and scale service delivery.

Innovation Suite at BMC

It's an extensible low-code platform for building ITSM products. It fuels customers IT transformation with intelligent, people-centric user experiences that helps you work smarter.
